SUMMARY

Strategy for converting website's viewers to purchasing customers and increasing the returning customer rate.

Understanding customer behavior by analyzing the number of viewers, customers who added items to their cart and customers who placed their order.

The data indicates positive both in the website traffic and the revenue growth trends, suggesting effective customer acquisition strategies.

INSIGHTS AND RECOMMENDATIONS

Insights

The conversion funnel analysis reveals that 10% of product page viewers completed a purchase, while 29% of viewers engaged with the shopping cart functionality. Among users who added items to their shopping cart, 35% successfully converted to complete a purchase, indicating a cart-to-purchase conversion rate of 35%.

Recommendations

Focused on the strategy to convert viewers to purchasing customers
We should investigation the customer behavior after their first purchasing

[Conversion Funnel Analysis](#)

INSIGHT AND RECOMMENDATION

Insights The 6.8% returning customer rate indicates significant room for improvement in customer retention strategies. Analyzing Retention Rate to show the % of returning customers in month 1, month 2, month 4. Recommendations With only 6.8% of customers making repeat purchases, there's substantial opportunity to optimize the post-purchase experience. This retention rate suggests potential issues in customer satisfaction, product quality, or follow-up engagement strategies. We should investigate the reasons which impacted to the number of returning customer.	Customer Returning Rate  A pie chart titled "Returning Customer Rate" showing the distribution of customer retention. The chart is divided into two segments: a small red segment representing "Returning" customers at 6.8%, and a large blue segment representing "No return" customers at 93.2%.
INSIGHT AND RECOMMENDATION	
Insights This analysis reveals significant revenue growth opportunities. The analysis identifies key drivers for sustainable revenue growth. Recommendations The increasing trends suggest revenue growth potential. The website has strong traffic acquisition and positive revenue growth trends but the 6.8% returning customer rate significantly underperforms industry standard.	Revenue Analyze  A bar chart titled "Revenue Analyze" showing the total revenue over a six-month period. The y-axis is labeled "Total Revenue" and ranges from \$0.00 to \$200,000.0 in increments of \$50,000.0. The x-axis is labeled "Month" and shows the periods from 2020-09 to 2021-02. The revenue shows a general upward trend, starting at approximately \$10,000 in 2020-09 and reaching nearly \$200,000 in 2021-02.

CONCLUSION

Implement the strategy focused on pricing, shipping, quality of product and customer services to support customer on their purchase.

Implement a structured rewards system as the based-point customer loyalty program.

Send the discount coupon after their first order.

Sending out some advertising campaign or promotion emails between their second time and third time purchasing.
